Dyson Air Multiplier fan is probably the biggest innovations in household fans since fan was created in 1882. This is because it eliminates the fan blades as well as the buffering and turbulence which built on a normal electric fan. It also very hygienic where it is easily clean with just a cloth since it has no blades. (Dyson, 2010)

Dyson Marketing Analysis - UKEssays.com

The Dyson fan range includes desk fans, tower fans, pedestal fans and 'Hot + Cool' fans that turn into portable heaters for the cooler months. Advantages of Dyson fans include: they're easier to clean than basic pedestal fans as they don't have grills or blades that gather dust they don't have fast-spinning
