Fiat Twin Air Engine

Fiat's TwinAir engine is an Straight-twin engine designed by Fiat Powertrain Technologies as part of its Small Gasoline Engine family — employing Fiat's MultiAir hydraulically actuated variable valve timing and lift technology. Offered in a variety of FCA vehicles in turbocharged and naturally aspirated variants, the engine is noted for its reduced size, weight, fuel consumption and CO2 emissions. In the 2011 International Engine of the Year awards, the 875 cc TwinAir won Best ...

Fiat Panda TwinAir review | Autocar

In short, the little Fiat is a joyous machine that makes you smile, but the car I'm talking about today is different. And better. It's the new TwinAir, so called because it has an engine quite unlike anything else we've ever seen before. There are only two cylinders, which is not a revolutionary idea. The original Fiat 500 was similarly equipped.

The Clarkson review: Fiat 500 TwinAir (2011)

Well, the TwinAir is faster, if not super-fast: 0-62mph takes one second less than in the 84bhp 500, and the irrelevant top speed climbs 10mph to 117mph. Getting close is a struggle, though.

Fiat 500 TwinAir review | Auto Express

The twin-air engine is a twin-cylinder in - line (parallel twin) engine with variable valve timing (MultiAir) from Fiat's subsidiary Fiat Powertrain Technologies . The engine has been in use since
