Firms in International Trade - Princeton University

Downloadable! Since the mid-1990s, researchers have used micro datasets to study countries' production and trade at the firm level and have found that exporting firms differ substantially from firms that solely serve the domestic market. Across a wide range of countries and industries, exporting firms have been shown to be larger, more productive, more skill- and capital-intensive, and to pay ...

Abstract: We extend the small country trade model with firm heterogeneity (Demidova and Rodriguez-Clare, 2013) to incorporate offshoring (along with final goods trade). We derive the firm-level employment implications of output and input trade and trade costs to provide a guide for our empirical work using Korean firm-level data for the period 2006-2016.

Firms in International Trade - American Economic Association

This paper adds to the existing firm-level evidence on international trade in non-tourism services, using a new Portuguese database merged with balance-sheet data. In accordance with the literature, we find that a small number of firms that both export and import services (two-way traders) with diversified service and geographical portfolios account for a substantial share of trade flows.
