Solutions to Genetics Problems This chapter is much more than a solution set for the genetics problems. Here you will find details concerning the assumptions made, the approaches taken, the predictions that are reasonable, and strategies that you can use to solve any genetics problem. The value of this chapter depends on you.

### Solutions to Genetics Problems

Genetics Practice Problems and Answers 1. The ability to taste a chemical called PTC is inherited as an autosomal dominant allele. What is the probability that children descendant from parents both heterozygous for this trait can taste PTC. a) 0. b)1. c)3/4. d)1/2. Answer.

### Genetics Practice Problems and Answers ~ Biology Exams 4 U

This is the number of combinations of 4 and 2. Now your results are  $15 p^m q^{n-m}$  which is  $15 \times (3/4)^4 \times (1/4)^2$ . You can do the calculation. b. The first one needs the binomial expansion, do in the same way, the second litter has only one outcome so the probability is just  $3/4 \times 3/4 \times 3/4 \times 3/4 \times 3/4$  or  $(3/4)^5$
