Taxonomy Browser. Supports searching the taxonomy tree using partial taxonomic names, common names, wild cards and phonetically similar names. For each taxonomic node, the tool provides links to all data in Entrez for that node, displays the lineage, and provides links to external sites related to the node. Taxonomy Common Tree

Taxonomy - Site Guide - NCBI

Mammalia is a class of animal within the phylum Chordata. Mammal classification has been through several iterations since Carl Linnaeus initially defined the class. No classification system is universally accepted; McKenna & Bell (1997) and Wilson & Reader (2005) provide useful recent compendiums. Many earlier ideas from Linnaeus et al. have been completely abandoned by modern taxonomists ...

The approach to analgesia and sedation in exotic companion mammals faces special challenges, including small patient size and unique features of the prey species mentality. Recognition of pain is more difficult in rabbits and rodents because many small mammals are very good at hiding the signs of pain commonly observed in predator species.

US Mammal List Taxonomy Questions - Mammal Watching

As mentioned in the Cervus thread linked above, the American Society of Mammalogists (ASM) has an online mammal taxonomy in the making. The IUCN Red List has never been a taxonomic authority in the first place, so using that list in the absence of an up-to-date (and regularly updated) mammal taxonomy is understandable but certainly not ideal.
