An internal combustion engine (ICE) is a heat engine in which the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine.

## **Internal combustion engine - Wikipedia**

Mazda's SUV range (CX-5 and CX-8) are popular with their owners and have a good reputation in the trade. Crucially, they're also available with a turbo-diesel engine, so they fit your criteria on that basis. We'd also suggest you take a good look at the South Korean brands' offerings (Hyundai and Kia) as these are also highly rated by the trade and those companies have been involved ...

It had a rather large problem, though. The extra weight added to give it its SUV shape and raise it up made its 4.0-litre straight-six 'Barra' petrol engine thirsty. Ford sought to overcome the issue by introducing a 2.7-litre V6 'Duratorq' single-turbo diesel engine along with the launch of the second-generation SZ range in 2011. These ...
