A Look at Psychopharmacology and Theories of Depression By David Gurevich June 11, 2010 We now believe that depression is in part a biochemical event. This theory did not come from nowhere - rather it comes from just 60 years of experimenting with medications that had biochemical effects.

A Look at Psychopharmacology and Theories of Depression

In psychology, theories are used to provide a model for understanding human thoughts, emotions, and behaviors. Throughout psychology's history, a number of theories have been proposed to explain and predict various aspects of human behavior. A psychological theory has two key components: It must describe a behavior.
