I've tried two XLS ESC's and two different 6528 TX's and get the same results on both. I only have one 6533 RX. The calibration doesn't complete fully and the end result is the throttle control is max with the slightest touch of the stick. spent hours now going through all options in the TQi manual and various reset procedures but can't seem to make it work correctly.

In addition to the three standard profiles (Sport, Race, Training Mode®), the XL-5 HV features a Trail profile that serves up a little bit of drag brake for smooth intuitive driving for most of your adventures.

**Amazon.com: Traxxas 3025 XL-5 HV Electronic Speed Control ...**  
I have a question about the XL-5 ESC in my rustler. I have been told that the max voltage is 9.6V is this correct? I want to put a 3s LiFeP04 in it, and the nominal is 9.9 volts and was wondering if that will fry the ESC. I have a 7-cell nimh that is 8.4 nominal but it comes off the charger at somewhere around 10.7, and that lifep04 should come off the charger at about 10.8 (I think).

**Rustler XL-5 Max volts - Traxxas**  
The XL-5 is backed by the Traxxas Lifetime Electronics Warranty. Traxxas High-Current Connector: The XL-5 ESC is equipped with the Traxxas high-current connectors for restriction-free current flow.
